The **'end to end'** mobile healthcare equipment solution

Agile Medical

The **'end to end'** mobile healthcare equipment solution.

Welcome.

Unlike other mobile healthcare equipment manufacturers, Agile Medical is a complete design, supply, deliver and maintenance solution, leaving your staff free to concentrate on far more essential day to day tasks.

We work with our clients to get a detailed understanding of the requirements and present a solution that goes way beyond the sale.

Agile Medical is dedicated to improving workflow and efficiency in healthcare environments through the implementation of mobilised patient care and IT clinical solutions, with ergonomics and Health and Safety and Infection control compliance in mind.

Linen Sack
Code **G5M12ZK Blue**

Dimensions: 620w, 1000h (mm)
Other colour stripes:
Red, Green, Yellow, Brown and Grey.

Case Study: NHS Royal Derby Hospital

Agile Medical supplied the Emergency Department at Royal Derby Hospital with 18no. Resus & Phlebotomy trolleys.

Among the many impressive features of the trolleys is the ability to incorporate a range of removable and dividable trays within the pull-out drawer.

This always proves to be a major advantage for our customers as it provides an excellent solution to the storage requirements and needs for so many different departments within a hospital.

What the client had to say:

“We would have no hesitation in recommending Agile Medical. Their trolleys are built to a high standard and the recent purchase of 18 of them for our Emergency department has proved to be of daily benefit for our staff.”

LX Blue Medication Trolley

Case Study: Homerton University Hospital

When the Hackney based Homerton University Hospital needed to upgrade their computer carts to a more robust, flexible and user-friendly model, they turned to Agile Medical, a company dedicated to improving workflow and efficiency in healthcare environments through the implementation of mobilised patient care.

“Our existing carts were big, bulky and non-height-adjustable which made it difficult for staff to perform essential day-to-day tasks,” explains Maddy Woods, Nurse Consultant for Medicines Management at the Homerton. “Agile Medical came in, examined our very specific requirements and came back with a bespoke version of their single-screen CPU cart that answered our needs exactly.”

Amongst the many requirements on the brief, Workstation On Wheels (WOWs) with ample space for medication and a mounting point for a scanner was of upmost importance to the team on site because electronic Prescribing Medicines Administration (ePMA) was being implemented. Therefore, we increased the size of the top cavity for increased storage capabilities which housed individual compartments for organising the medication correctly. The medication compartment on every Medicow cart is secured with a lock and key for security and safety reasons.

Homerton University Hospital also realised the importance of having a service contract in place. Agile Medical currently provides a standard 3 year service package for maintenance of the 100+ Medicow carts on site at Homerton Hospital which includes free call outs and replacement parts fitted by our engineers.

What the client had to say:

“We presented Agile Medical with a long list of challenges and they came back with a solution that met our brief permanently. And, because Agile Medical carts are of a superior build, we know they will stand the test of time and save us having to repeat the process a few years down the line.”

Terms of Trading

Deliveries/Service

We undertake to do our utmost to execute every order within the shortest possible time. There are three different delivery bands. The lead times for these three bands are as follows:

 **IN STOCK**
Products held in stock in our warehouse and normally available for delivery within 2-4 working days of receipt of order.

 **SPEED RANGE**
These are popular product lines normally available for delivery within 5-10 working days from receipt of order.

 **TO ORDER**
These are all other sizes and products not held in stock or on Speed Range status and are normally available within 20-25 working days from placement of order.

We cannot accept liability for any direct or indirect loss which may arise if a delivery is delayed due to unforeseen circumstances or conditions beyond our control.

Carriage costs

Variable charge according to distance and order value.
Same day/timed or dedicated vehicle. Charged at cost + 5%

Please note: We cannot accept responsibility for damaged or missing goods unless we are notified in writing within 3 working days of receipt of delivery. For goods arriving via carrier or courier, please ensure that any damage or deficiency is noted on the driver's docket/proof of delivery at the time of delivery as it is impossible to make a claim against the courier once a delivery has been signed for as "received in good condition".

Warranty

All materials are under warranty for a twelve month period. Within this period we will replace free of charge any components that prove to be of defective manufacture. Please note that this warranty will be rendered null and void if items have been overloaded, abused, dismantled and re-erected incorrectly or mistreated in any way.

Due to lighting conditions and the reprographic process, there may be some slight difference in colouration of the actual products than appears in the photographs. As part of our programme of continuous improvement, Agile Medical reserve the right to change and update products without prior notice.

Reservation of title/Re-stocking/Order cancellation

Please note that under our trading terms, title of goods supplied only passes from the company on receipt of payment. We are able to re-stock (take back) standard stock items if required. A recognised re-stocking charge of 15% of the order value will be applied. Goods must be undamaged and in resaleable condition. In the case of an order cancellation for non-stock items where goods have been specifically purchased or manufactured against a confirmed purchase order it may not be possible for us to avoid raising an invoice for the full original purchase order value.

Payment terms

Credit account facilities are available subject to satisfactory bank and trade references being obtained. With approved accounts, our terms are that payment is due in full within 30 days from the end of the month in which the goods/services were delivered/provided. For non-account transactions we accept payment by cheque, cash, bankers draft, VISA, Mastercard and BACS. (For cheque payment please allow sufficient time for funds to clear.)
