

# Phlebotomy Seating

Excellent design for the comfort of patient and nurse.

**The Agile Medical phlebotomy chair combines comfort and seamless functionality. Easy operation makes it possible to act quickly in emergency situations. The patient can be put in the Trendelenburg position in one quick move.**

The Agile Medical phlebotomy chair makes it possible to sit comfortably and relax during blood sampling. The nurse can provide back and leg support simultaneously which ensures good support to the patient's whole body. When reclined, the nurse or medical expert can also use it as a treatment table. It is equipped with two height adjustable armrests for the left and right arm. By opting for the multi-adjustable armrests it is even easier to put the patient's arm in a correct and relaxed position and the nurse can draw blood from the patient's arm in an ergonomically responsible manner.
