Real Life Operational Benefits

A case study of Manchester NHS Trust

“Our Anaesthetic trolley provides the option to anaesthetise in theatre, removing any unnecessary patient movement and improving safety. The standardised layout and content of our trolleys make it easy for practitioners to transfer between theatres and hospitals and we have eliminated a large amount of waste and out of date products by removing the majority of stock from our Anaesthetic rooms”

Adam Dobson *Manchester University NHSFT*

Patient Safety

The option to anaesthetise in theatre removes unnecessary patient movement to theatre

Compliance

Reduce the risk of out of date stock with lower stock levels in fewer locations

Practitioner Comfort

Standardised trolley layouts allows practitioners to feel at ease quickly when working in unfamiliar theatres

Operational Efficiency

Save up to 15 minutes per patient with equipment more readily available within the operating theatre

Stock Control

Reduce stock held in anaesthetic rooms by up to 60% and minimise waste caused by out of date items

Optimise your workflow

- 100% digital process (paperless)
- Live trolley readiness
- Automated alerts
- Early warning system for expiring products
- Instantaneous audit data
- Minimise risk of stock outs
- Increase CQC compliance with live dashboards
