

Soiled Linen Case Carts

Experienced design for optimum infection prevention.

Our Soiled Linen Case Carts are sturdy, long-lasting and easy to manoeuvre, providing the optimum solution for the collection and transportation of soiled linen from hospital wards. Developed and adapted in accordance with NHS infection prevention standards through years of practical experience. with no interstices or overlapped sheets to prevent build-up of HATs.

Options:

Small - 366ltr

Medium - 699ltr

Medium (2 compartments) - 714ltr

Large - 987ltr

Strong **non-twisting bottom frame** in epoxy coated steel which is the structural element of the carts that gives stiffness to all the assembled components and supports the mechanical stress exerted when towing multiple carts.

Soiled Linen Case Carts

Features:

- No sharp edges, to protect users and goods.
- Ribbed walls increase strength without increasing weight.
- Fully enclosed to prevent contaminated air escaping.
- Designed to allow for automated washing without water retention.
