Security clamp		DRS200
Waste container with lid		WCS213

For our full range of trolley accessories see pages **108-111**.

Queen Elizabeth Hospital is a large and busy hospital based in Woolwich, London with over 500 beds. The Theatre department approached Agile Medical to find a trolley solution that would house specialist medical equipment and IT hardware for viewing vital statistics. With sixteen 1-Patient recovery bays in both the Theatre and Day Surgery departments at this hospital, space is at a premium also.

We worked successfully with key medical staff to provide a solution for both departments. We developed what we now call our Theatre Recovery Trolley. Agile Medical's trolleys now provide medical staff working in the bays with both secure storage and easy access to vital equipment and supplies.
