

Workbenches

Healthcare environments cover a wide range of different workflows. Does your work centre around sterile supplies processing, wet lab testing or administrative duties which require a dedicated space with storage?

With highly experienced in-house design and manufacturing expertise, our team at Agile Medical are well placed to support you in creating the optimal workstation for your specific needs.

“The workbenches are built to last, very suited for an EBME department. The versatile storage combined with power supply and lighting make these a great asset for the department.”

Guy's and St Thomas'
NHS Foundation Trust

Workbenches

The Agile Medical range of workbenches are renowned for high durability, task-specificity and a variety of modular and custom options. The most common application is in medical engineering departments, with other frequent applications being in preparation areas such as processing blood samples in phlebotomy and sterile supplies in surgical areas. The upper unit supports accessories, shelves and cabinets, which can be configured to meet the requirements of your specific application, ensuring frequently used materials remain organised. Multiple power extension options are available with the range, particularly suited for medical device testing in medical engineering departments.

Key benefits:

With a robust steel frame construction, these are suited to even the toughest healthcare environments and can be easily cleaned down with all standard healthcare cleaning equipment. Trespa worktop offers long-term durability and a hygienic, easy to clean worksurface.

- Available in **multiple widths and heights**
- **Adjustable feet** to ensure level worksurface
- Choose from **drawers, shelves or cupboards**
- Multiple **power extension options**.

Ordering:

Product	Code
Workbench 1600W	WB1679/D4
Workbench 1800W	WB1879/D4

Streamline productivity, save space, and improve throughput efficiency in your department with the Agile Medical range of Workbenches.
